First quarter highlights included:

- Combined ratio of 92.1% compared to 86.1% in the prior year, primarily as a result of higher weather-related losses along with increased private passenger automobile claims frequency.
- Growth in direct written premiums of 15.0%, driven primarily by growth in our commercial and non-standard auto segments.
- After-tax increase of \$1,509 in net unrealized gain in our equity securities portfolio compared to a decrease of \$12,588 in the prior year, which increased earnings per share for the quarter by \$0.64.

"While the combined ratio for the first quarter of 2021 is 6 points higher than the first quarter of 2020, we consider a 92.1% combined ratio a very strong start to the year," said Michael J. Alexander, President and CEO. "Our results were impacted by a return to average weather-related losses in the home and farm and commercial segments, elevated fire losses in the commercial segment as a result of the winter weather conditions on the East Coast, and higher private passenger auto claims frequency. Overall, we are pleased with our premium growth, improved ROE, and increase in net income."

"We continue to benefit from the diversification provided by our commercial and non-standard auto segments. In the first quarter, the commercial segment continued its run of strong new business while also benefitting from a favorable rate environment. Our non-standard auto segment also experienced strong growth in the quarter while achieving a combined ratio of 69.5%."

Shareholders' equity increased \$3,718 from December 31, 2020 to March 31, 2021. This increase was primarily due to consolidated net income of \$9,782, partially offset by a decrease in accumulated other comprehensive income from our fixed income portfolio. The Company repurchased 32,326 shares of common stock for \$596 during the quarter.
