- Notes:
 (3) The loss and loss adjustment expense ratio equals losses and loss adjustment expenses divided by net premiums earned.
- (6) Direct premiums written represents the amount of insurance premiums purchased by policyholders during the period.
- (a) Multi-peril crop and crop hail insurance premiums are generally written in the second quarter and earned ratably over the remainder of the calendar year. First quarter activity is the result of minor prior crop year adjustments which typically occur annually during first quarter.
- (b) All other includes primarily excess liability and other insurance coverages, as well as assumed domestic and international reinsurance programs which are intended to diversify the risk exposure of the company.
